

GORILLAgrid

**THE MOST INTELLIGENT, ECONOMICAL,
VERSATILE & STRONGEST CEILING SYSTEM
ON THE MARKET**

Integrated Solution:
Everything works together

- Grid
- Lights
- Blanks
- Hanging Hardware

Ready for Your Additions:

- Filtration
- Working platform / maintenance needs
- Flush walkable mezzanine (optional)
- Process equipment

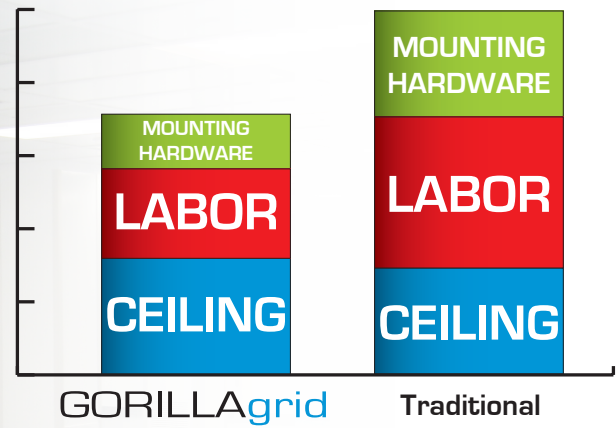

Perfect for commercial, industrial and other speciality applications.
Hospitals/healthcare, food processing, laboratories, cleanrooms, public spaces and more.

Manufactured by:

1 GM Drive Dr., East Syracuse, NY 13057
Ph: (315) 437-6500

▲ Total Install Cost

The lowest total installed cost on the market. No sub-steel, fewer hangers and a quick install design mean most installers can hang up to 500 sq/ft per man, per day. This equals big savings on labor and parts.

▲ Intelligence

Gorilla Grid's flexibility allows hangers to be mounted anywhere on the grid - **ELIMINATING SUB STEEL STRUCTURES**. In addition, the universal cross tee system allows for any grid sizing structure and multiple layout configurations.

▲ Strength

Gorilla Grid's structural integrity reduces the number of hangers and hanger parts needed and allows it to be designed to meet **weight-bearing** and **walkable** ceiling requirements. Perfect for mounting roomside equipment or eliminating cat walks or expensive service mezzanines.

▲ Ceiling System

Available options include, but are not limited to:

- *Factory Engineered System (for single source responsibility and ease of coordination)*
- *Blank panels*
- *Lights (LED)*
- *Integrated sprinkler systems*
- *Hanging supports/mechanisms*
- *Seismic dampers*
- *Terminal Devices*
- *Gasket Seals*

Whatever your application needs, this system has a clean, well designed solution.
